By analysing the tree we can see that the individuals most closely related to our SUSPECT displayed below. After cross-referencing the metadata we are provided with two general commonalities among the closest matches – they are either european or east asian. Exploring further, we see 4 of these close matches are chinese specifically, 4 of them are finnish, 2 are british, and 1 is spanish. The absolute closest match was HG00357 – found in finland. This would be my suggestion for investigators to begin their investigation, followed by china.

HG02406 – male, dai chinese, east asian

HG01525 – female, spanish, european

HG00634 – male, south han chinese, east asian

HG00436 – male, south han chinese, east asian

HG00366 – male, finish, european

HG00242 – male, british, european

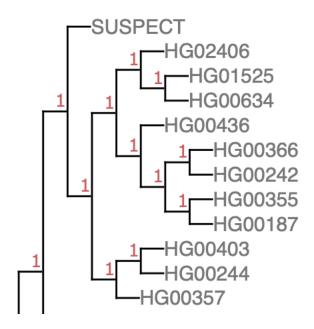

HG00355 – female, finish, european

HG00187 – male, finish, european

HG00403 – male, south han chinese, east asian

HG00244 – male, british, european

HG00357 – female, finish, european

ETE 3: Reconstruction, analysis and visualization of phylogenomic data. Jaime Huerta-Cepas, Francois Serra and Peer Bork. Mol Biol Evol 2016; doi: 10.1093/molbev/msw046
